

**AMSEC** is an industry leader in the installation of complex Command, Control, Communications, Computers, Intelligence, Surveillance, and Reconnaissance (C4ISR) systems. We are arguably the most capable and cost-effective Navy shipboard C4ISR Alteration Installation Team (AIT) service provider in the business today. AMSEC has experience on submarines, surface ships, and aircraft carriers, as well as shore installations. In a recent two-year period, we completed over 90 U.S. Navy C4ISR upgrades ranging from \$25,000 to over \$2 million. On a typical day, you will find over 500 AMSEC employees working on 40 Navy ships, including every aircraft carrier in port. **AMSEC is one of an elite group of AIT service providers that can**

**deliver the comprehensive design, engineering, and integrated logistics support products required for total C4ISR life-cycle maintenance.**

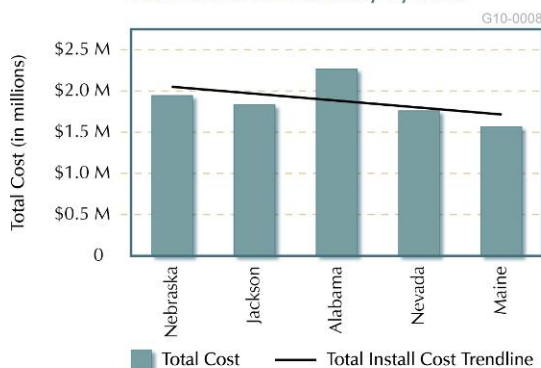

**AMSEC provides enterprise Information Technology (IT) solutions.** The Technology Analysis and Solutions (TAS) organization develops and deploys customized enterprise solutions that enable our customers to meet their critical business objectives and provide vital IT support for mission accomplishment. The Virtual In-Service Engineering (VISE) project demonstrates innovative use of Microsoft SharePoint and custom .NET solutions for the Naval Undersea Warfare Center (NUWC) Keyport. The key element to our success in providing enterprise solutions is our strong team concept with the customer.

**Our commitment to earned-value and lean-process improvements continues to save taxpayer dollars.** AMSEC has consistently delivered high-value, high-quality installations of required systems, both onboard Navy ships and at shore sites. We bring industry "best practices" to every installation. As shown below, AMSEC repeatedly has displayed the capability to deliver increasing value over time in our C4ISR installations. We get it right and we apply a rigorous continuous improvement philosophy to every project. **AMSEC delivers quality and value while eliminating waste.**

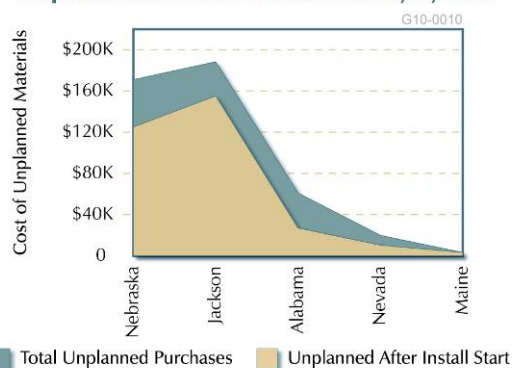

### Enterprise Solution Project

**Total Install Cost History by Boat**

**Unplanned Material Purchase History by Boat**

AMSEC's install total costs to the government continue to trend in the right direction, lowering over time.

### AMSEC Capabilities at a Glance

- C4I Installations
- Program Management
- Modernization Support
- Integrated Logistics Support
- Planning and Design
- Operations Support
- Distance and Onsite Maintenance Support
- Manufacturing, Fabrication, and Repair

▪ **Low Risk:** AMSEC has the necessary skilled resource and management structure to meet your installation demands. We have routinely conducted five C4ISR installations concurrently in various homeports. AMSEC has assembled a team of highly skilled and experienced companies to supplement our ability to meet surge requirements. Our association with several shipyards affords the support of additional resources. AMSEC is the only major shipboard installation provider with the capability to produce the design and engineering products required by the Navy's modernization program.

▪ **High Quality:** AMSEC brings innovation to the program structure and ensures exceptional quality of products, services, and cost control. As an ISO 9000:2008-certified company, our quality system serves as a foundation and ensures the customer's work requirements are performed to the specified standards.

▪ **Cost and Schedule Performance:** AMSEC performs work for the cost we quote and has a history of delivering work on time. In fact, we encourage our personnel to make cost and schedule improvement recommendations. For example, the recommendation to move the locations for Engine Room Local Area Network (LAN) drops on Fast Attack Submarine (SSN) LAN installations resulted in \$40,000 worth of savings (per submarine) for the government. AMSEC routinely applies these "lessons learned" to gain efficiencies over time, and we can prove it.

▪ **Infrastructure:** AMSEC has the necessary footprint in manufacturing, fabrication and repair on both coasts. Our facilities are located in:

- Hampton Roads, Virginia
- San Diego, California
- Mayport, Florida
- Everett, Washington
- Pearl Harbor, Hawaii

**AMSEC is "Quality People Providing Quality Service." While our employees may no longer serve on active duty, we are committed to and continue to proudly serve the U.S. Navy – our Navy.**
